*DETAILED ACTION*

*Claim Objections*

Claims 1-3 are objected to because of the following informalities:

In claim 1, last three lines, the limitation “said threaded stud and said round projecting edge that is thereby articulated along the entire supportive rod component” lacks proper antecedent basis for this limitation in the claim. **The Examiner suggests:** -- a slot through said tapered rod, said threaded stud and said round projecting edge. --

Appropriate correction is required.

In claim 2, line 4, the limitation “or a hexagonal, square or pentagonal socket in the end surface of its circular head” is not clear. **The Examiner suggests:** -- or a circular head having in the end surface of its circular head a hexagonal, square or pentagonal socket. --

Appropriate correction is required.

In claim 3, last three lines, the phrase “said adjustment rod lacking said round projecting edge at its proximal end, but instead” is not clear. **The Examiner suggests:** delete “lacking said round projecting edge at its proximal end, but instead”. Further, replace “said” with -- a -- before the word “hexagonal”.

Appropriate correction is required.

***Conclusion***

This application is in condition for allowance except for the following formal matters:

Informalities objected to in claims 1-3 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
